

Please do NOT preempt state Telephone Privacy laws in favor of adopting one lower national standard. The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Before the Indiana law took effect, we were receiving 2-3 calls per evening and 5-6 calls during Saturday/Sunday from telemarketers. It was more than annoying. Now, we receive maybe one solicitating call a month. If you want to consider a federal law...please include language that does not circumvent any existing state laws. Thank you
